

ISEE SMART HOME

TECHNOLOGY WELL : LIFE WELL

Smart touch keys **Isee**

- Touch key with modern technology
- Smart Modbus protocol
- High power relays with high power
- The possibility of modular installation without the need for a smart central panel
- Possibility of communication with intelligent relay box (intelligent panel system)
- The possibility of production with the color desired by the user design and

Multi function switch

- control 12 lighting line
- control 2 thermostat separately
- control 2 motor curtain
- smart connection for home automation system

Smart thermostat

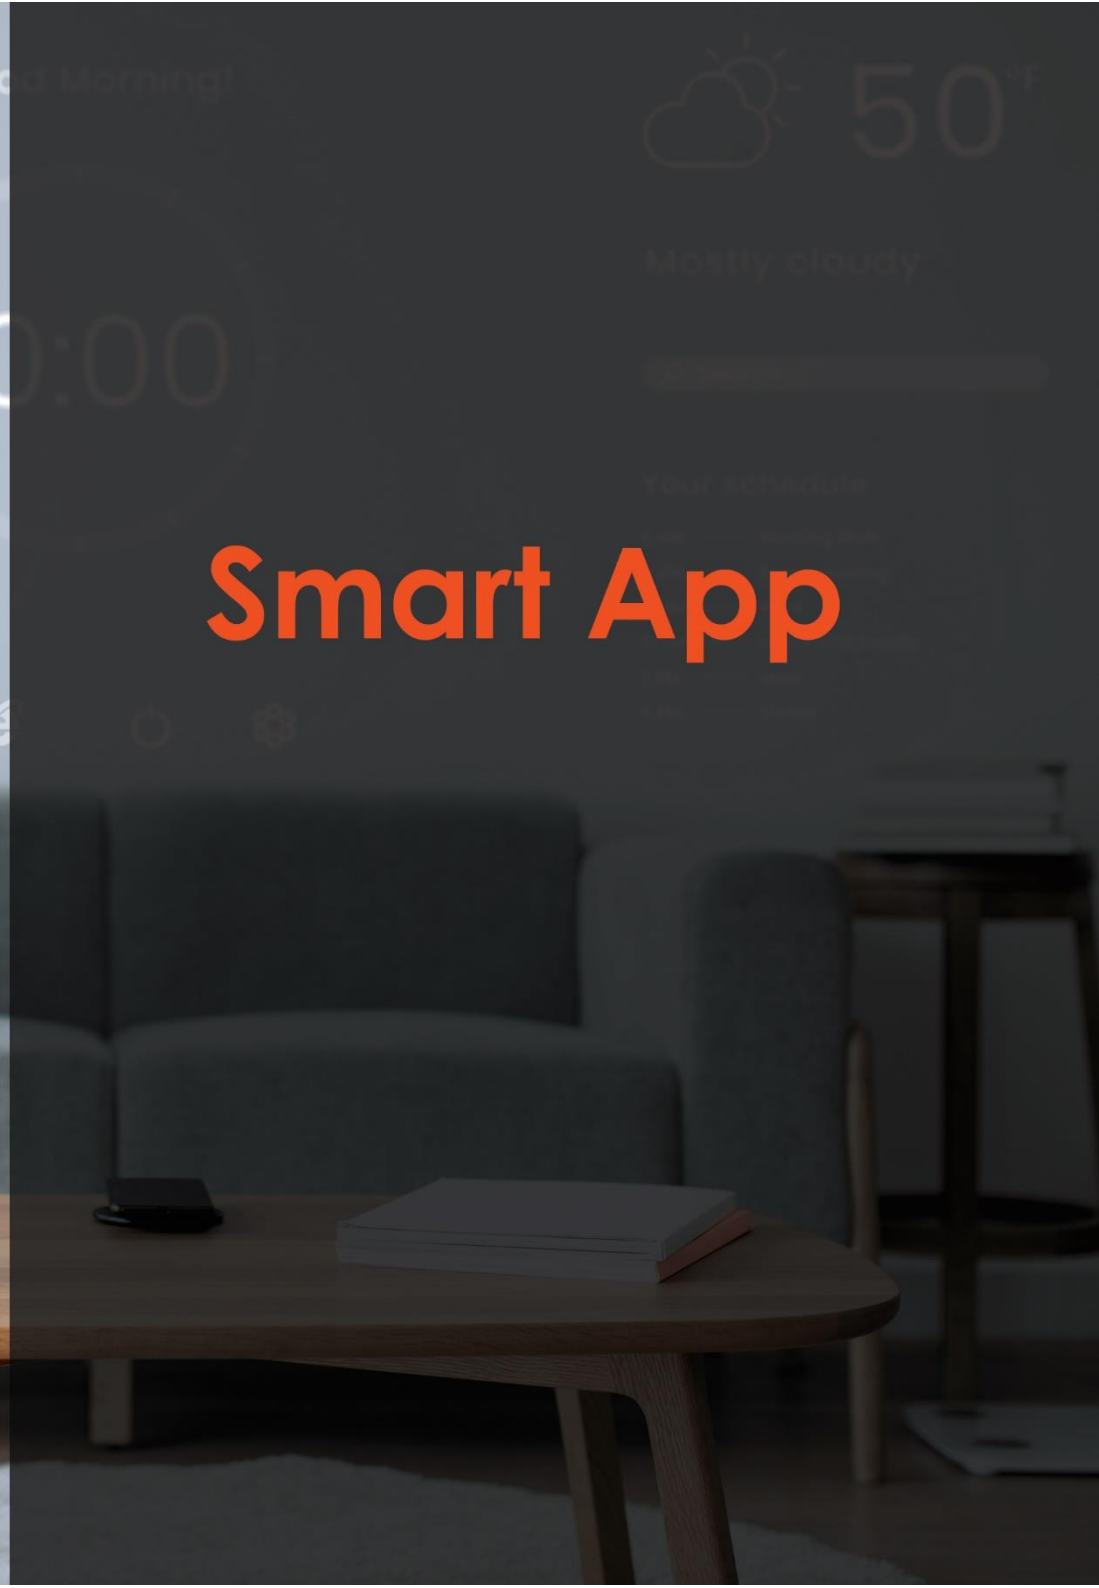

- smart control air conditioner system
- control split , fancoil , cooler and ,.....

Smart **multi function** key

- Control of 12 lighting lines
- Separate control of 2 fan coils (ventilation system)
- Separate control of two electric curtain motors
- Smart Modbus protocol
- The possibility of connecting to a smart relay box (intelligent panel system)

Smart IR control

- IR control of split and air conditioner
- smart protocol-

Smart monitor 7" 10"

- 7" & 10" capacitive touch screen, 1024 x 600
- Video monitoring of DNAKE IP intercoms & IPC
- HD quality audio and video communication
- 8-ch alarm input, 1 x RS485
- Standard PoE (IEEE802.3af) / 12V DC
- 802.11b/g/n Wi-Fi and 0.3MP camera optional
- Quick installation and remote management via web interface
- Easy home automation integration through 3rd-party apps

smart module

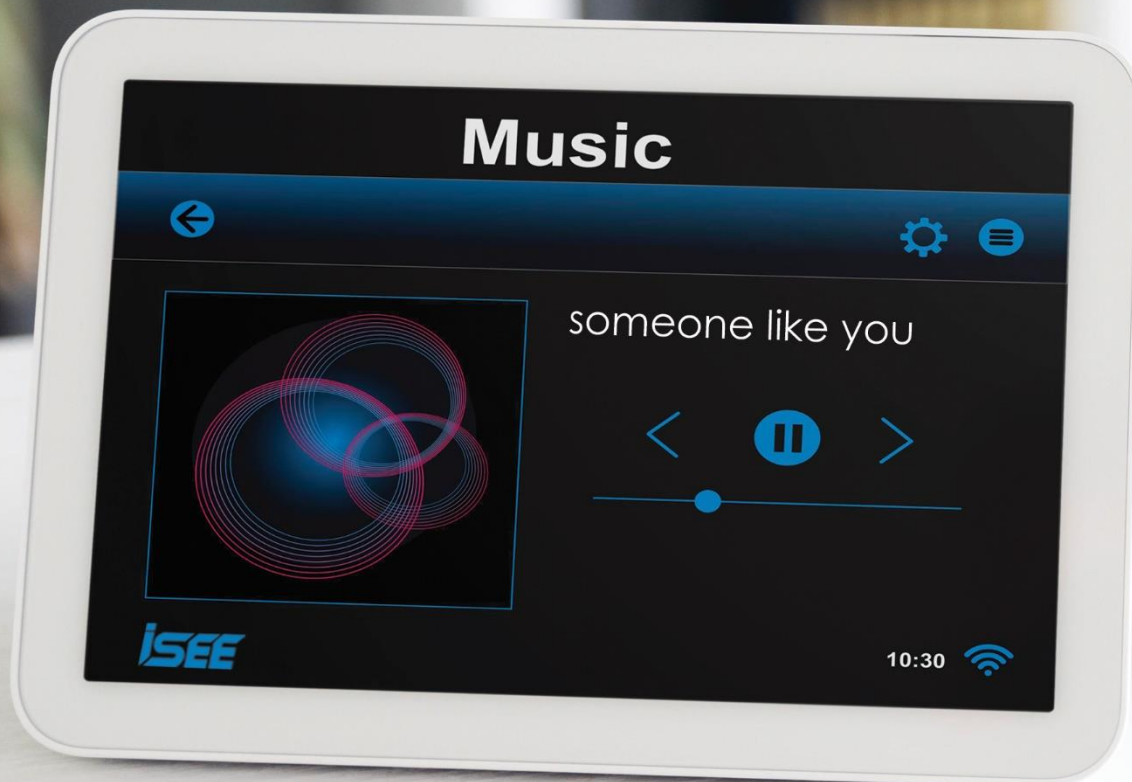

- ability smart control for mechanic switch
- Smart Socket control

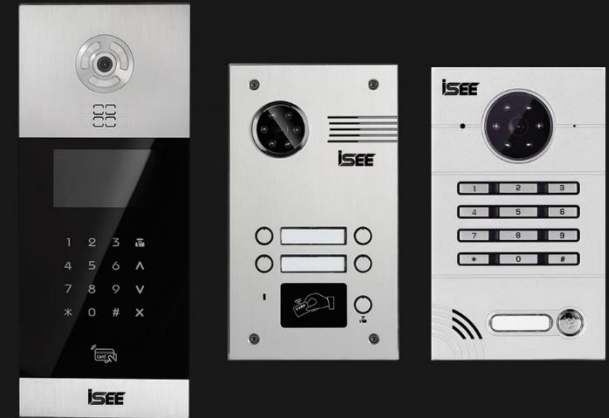

Intelligent video surveillance system

- Security system monitoring
- Transferring the image of the unit's door camera to the software
- Smart Modbus protocol

Smart audio system

- Play your favorite music with the possibility of separating the space
- High quality sound system
- Control through the user's mobile phone
- The possibility of connecting to TV, a suitable alternative to home cinema systems

Sipvideo door phone

- 4.3" color TFT LCD
- Visible light face recognition
- 2MP HD camera with IR support
- Anti-spoofing algorithm against photos and videos
- Support multiple access control methods: facial recognition, password, remote unlock
- 13.56MHz / 125kHz access cards
- Up to 10000 faces, and 100000 cards can be added
- Cold-resistant version (-40 °C to 55 °C) available
- Quick to install and easy integration with IP telephone systems using SIP protocol support
